## PROJECTS

### ONLINE FURNITURE SELLING WEBSITE

This is the final year project I did in my college, it is built using PHP & MYSQL.

I built it using Three.js, jQuery, HTML, CSS, and Javascript. The users can buy furniture, and also look at the 3D models of each product which will improve the user's experience.

Users can read blogs about interior design, gain furniture insights, and leave reviews.

GitHub repository- [mySpace website](#)

### NEWSPAGE - BLOG

This is a news page built using React which I built during my internship.

I built it using ReactJS, HTML, CSS, and Javascript.

When a user clicks on an article summary from the homepage, they are navigated to a detailed view of the article.

Used a public news API like NewsAPI to fetch news articles.
